

### WHY DOES OUR PROGRAM WORK SO WELL?

We often get asked this question. It's because we focus on the individual student and not a classroom of students. The largest ACT/SAT score increases are seen when ACT/SAT prep is customized for the individual student. This is also why a baseline test is so effective. Our ACT/SAT practice test score reports are used as a student diagnostic.

The ACT/SAT tutor will hone in on the specific needs for the individual. The diagnostic report reveals trends such as pacing and themes among certain question types. On the SAT reading section, the student may have the most trouble with command of evidence. For the ACT math section, it might be quadratic equations that need the most attention. Our ACT/SAT tutors will come to students' homes on weekdays or weekends.

Here's one of our ACT prep students that went up 5 ACT composite points, after 6 sessions of one-to-one prep. English went up 3 points, math shot up 7 points, reading increased by 6 points, and science jumped up 4 points.
